TECHNICAL SKILLS

- **Python 3.** (Numpy, Matplotlib, Pandas) for data analysis
- **PowerBI** for data visualisation
- **Tableau** for data visualisation
- **SQL (MySQL)** for data structuring and getting data for analysis
- **Statistics for hypothesis testing and making conclusions**
- **SPSS** for social quantitative data analysis
- Low level **HTML5 CSS3** for simple web design
- **Github** for project repository
- Low level **JAVA** (spring) for simple web app development
- Low level **Javascript** for interactive web design
- MS 365 for writing and analyses
- Chat GPT3

LANGUAGES

English C1

Russian A2

Lithuanian C2 (Mother tongue)

PROFILE

After years of endless education I came to a conclusion that I want to deploy my intelligence in field of data analysis. That is why I chose to adapt and learn more about different tools of data analysis at Vilnius Coding school. Now I am open for junior data analyst or junior BI analyst roles.

EDUCATION

Vilnius Coding School

2023 October

Junior Data Analyst course

During the course I practically learned about different tools of data analysis and visualisation. Made a project with ESS9 index variable presentation with PowerBI. Used SQL to clean data and prepare it for analysis/visualisation. Made a project with Python using fake marketing data. Check my portfolio page for them.

Vytautas Magnus University

2018-2022

Bachelors of Sociology and Anthropology

Learned about scientific quantitative and qualitative research methodologies, critical thinking, statistical hypothesis testing with SPSS, social theory. Made lots of semi structured interviews and constructed a few social data questionnaires for data gathering.

Kaunas "IT school"

2017-2018

Junior Java programming course

First programming experience. Constructed simple android app with a design, created a web page with HTML/CSS and used Javascript for more responsive design.

WORK EXPERIENCE

Transcom

2022-2023

Vinted Project: Client representative via live "chat"

I communicated with individual clients and our team and tried to find solutions for client problems. I have learned about organisational structure, communication within the organization and communication with clients, problem solving skills.

UPS project: B2B logistic coordination

I communicated via phone and email with UPS storages and UPS business clients. Called to warehouses for check up on orders. Learned to communicate and to apply auto-email functions.
